#### In stock and ready to ship

#### Description

Source 1 Polymer release coating is designed to release gel-coated reinforced polyester or vinyl ester parts from gel-coated molds. Polymer Release Coating is an advanced polymeric resin in a non-chlorinated organic solvent blend. Polymer Release Coating is ideally suited for high gloss applications. The product is quick and easy to apply and produces a high gloss durable finish capable of giving many releases before re-application is necessary.

#### Advantages

- Easy application
- Non contaminating
- Non-chlorinated, Ecologically friendly solvents
- Low odor
- Superior gloss retention
- Durable; provides multiple releases per application
